
a
KEGG Pathways
Legionellosis
Pathways in cancer
Protein processing in endoplasmic reticulum
Melanoma
Non-small cell lung cancer
MicroRNAs in cancer
Glioma
Chronic myeloid leukemia
Cell cycle
Small cell lung cancer
Lipid and atherosclerosis
Oxytocin signaling pathway
Cellular senescence
Hepatitis B
Hepatocellular carcinoma
Circadian rhythm
FoxO signaling pathway
Pancreatic cancer
Epstein-Barr virus infection
Antigen processing and presentation
Fluid shear stress and atherosclerosis
Ubiquitin mediated proteolysis
MAPK signaling pathway
Thyroid cancer
Breast cancer
0.0 0.5 1.0 1.5 2.0 2.5 3.0
-log10 Adjust P-value
c
Cell cycle
DNA replication
Progesterone-mediated oocyte maturation
Nucleotide excision repair
Mismatch repair
Oocyte meiosis
Cellular senescence
p53 signaling pathway
Butanoate metabolism
Base excision repair
Viral carcinogenesis
Synthesis and degradation of ketone bodies
Human T-cell leukemia virus 1 infection
Fanconi anemia pathway
Hepatitis B
Fatty acid elongation
Homologous recombination
FoxO signaling pathway
Ubiquitin mediated proteolysis
Valine, leucine and isoleucine degradation
Epstein-Barr virus infection
RNA degradation
Small cell lung cancer
Measles
Spliceosome

b
KEGG Pathways
Lipid and atherosclerosis
Fluid shear stress and atherosclerosis
MAPK signaling pathway
Pathways in cancer
NF-kappa B signaling pathway
Pancreatic cancer
Hepatitis B
TNF signaling pathway
Rap1 signaling pathway
Cellular senescence
Epstein-Barr virus infection
FoxO signaling pathway
Kaposi sarcoma-associated herpesvirus infection
Estrogen signaling pathway
Legionellosis
Glioma
Chronic myeloid leukemia
Protein processing in endoplasmic reticulum
Regulation of actin cytoskeleton
Human T-cell leukemia virus 1 infection
Oxytocin signaling pathway
Shigellosis
B cell receptor signaling pathway
Human cytomegalovirus infection
Longevity regulating pathway

-log10 Adjust P-value
d
Cell cycle
DNA replication
Oocyte meiosis
Cellular senescence
Progesterone-mediated oocyte maturation
Nucleotide excision repair
p53 signaling pathway
Mismatch repair
Human T-cell leukemia virus 1 infection
Base excision repair
Pyrimidine metabolism
Pentose phosphate pathway
Parkinson disease
Valine, leucine and isoleucine degradation
Fanconi anemia pathway
Butanoate metabolism
Synthesis and degradation of ketone bodies
Viral carcinogenesis
Hepatitis B
Ferroptosis
Homologous recombination
Proteasome
Small cell lung cancer
Ubiquitin mediated proteolysis
Steroid biosynthesis
