a
KEGG Pathways
Cell cycle
Viral protein interaction with cytokine and cytokine receptor
Pentose and glucuronate interconversions
Drug metabolism
Cytokine-cytokine receptor interaction
Oocyte meiosis
Retinol metabolism
Ascorbate and aldarate metabolism
Metabolism of xenobiotics by cytochrome P450
IL-17 signaling pathway
Progesterone-mediated oocyte maturation
Caffeine metabolism
Porphyrin and chlorophyll metabolism
Neuroactive ligand-receptor interaction
GABAergic synapse
Morphine addiction
Salivary secretion
Chemical carcinogenesis
Chemokine signaling pathway
Steroid hormone biosynthesis
Taste transduction
Bile secretion
Serotonergic synapse
Synaptic vesicle cycle
Nicotine addiction

b
KEGG Pathways
Regulation of lipolysis in adipocytes
PPAR signaling pathway
Retinol metabolism
Tyrosine metabolism
Neuroactive ligand-receptor interaction
Pancreatic secretion
Drug metabolism
Hypertrophic cardiomyopathy
ABC transporters
Fat digestion and absorption
Metabolism of xenobiotics by cytochrome P450
Dilated cardiomyopathy
Steroid hormone biosynthesis
AMPK signaling pathway
Protein digestion and absorption
Malaria
Adrenergic signaling in cardiomyocytes
African trypanosomiasis
Fatty acid degradation
cGMP-PKG signaling pathway
Pyruvate metabolism
Cardiac muscle contraction
Adipocytokine signaling pathway
Cholesterol metabolism
Cytokine-cytokine receptor interaction
